Reach a decision with your patient

Evaluate your patient's decision

Patient Description

Donald Jones:

- 47-year-old African American male
- Previously seen for kidney stones now interested in prostate cancer screening
- Unmarried
- No Children
- Second degree family history of prostate cancer
- Had 1 episode of kidney stones 1.5 years ago and recent kidney US ordered by PCP was negative. No new symptoms or episodes. Wants to discuss whether he should do prostate cancer screening

SCRIPT: You are the "CLINICIAN"

Clinician: "I am (Title/name), it has been a while since we saw you. What brings you in today?"

(Patient will respond)

Clinician: Seek your patient's participation in Shared Decision making

(Patient will respond)

Clinician: Help your patient explore and compare treatment options

Please explore the pros and cons of the following options:

- No screening ever
- PSA screening every 1-2 years if PSA 1-3ng/ml, every 2-4 years if PSA <1ng/ml starting from age 40-75 (NCCN Guidelines)
- PSA screening every 1-2 years starting now (AUA Guidelines)

- Delay PSA screening until age 55 or 60

(Patient will respond)

Clinician: Assess your patient's values and preferences

(Patient will respond)

Clinician: Reach a decision with your patient

(Patient will respond)

Clinician: Evaluate your patient's decision in concordance with their values.

(Patient will respond)

Clinician: wrap up the patient visit
